6 Must Do's to Successfully Migrate from Enterprise Vault to Microsoft 365

1

PROGRESS REPORTING

How the project is moving forwards. Details of related or unresolved issues

2

USER COMMUNICATION

Keep users up to date about what is happening with their data

3

PREPARING TO MOVE DATA REPOSITORIES

If you're moving legacy data there are many tasks that should be performed to ensure a smooth transformation

4

COPYING THE DATA

Extract data from EV and ingest it into Office 365 quickly, and with full chain of custody

5

PERFORMING TASKS ON OFFICE 365

E.g. setting mailbox quotas or message size limits or enabling personal archive mailboxes

6

PERFORMING TASKS ON ENTERPRISE VAULT

E.g. deleting Enterprise Vault email shortcuts to tidy up the mailbox
