Software Developer –
User Interface

cloudficient is a privately held company, headquartered in Switzerland, focused on improving the end-to-end management of Office 365, dedicated to the goal of putting ultra-efficient, cutting edge cloud management in the hands of every business – of every size.

Our solutions use artificial intelligence and anomaly detection to manage what may otherwise be missed, thus lowering costs and increasing efficiency. We provide a revolutionary experience covering your whole Office 365 administration, monitoring, reporting and other requirements.

We have an outstanding career opportunity for a Software Developer to join our team. The applicant should be a technical minded individual with the desire to expand their current knowledge and experience within Microsoft technologies. The ideal candidate should have a University degree qualification with development experience, have knowledge of ASP.NET MVC, and be willing to learn new technologies.

Responsibilities

Working together with a team on current products or new solutions, helping us innovate our products and deliver value to our customers. You will assist other team members to resolve customer issues with our software. Other duties will include finding new ideas, solutions and technologies (R&D) to help the business further exceed client expectations and move us above our competitors.

You should be passionate about programming, drive to learn new technologies, and be able to adapt quickly to changing requirements.

	We always tell our customers and partners the truth, even when it's hard. If we promise something, we live through our commitments, whatever it takes. If we're in doubt, we do the "right" thing.
	We are of the opinion that purely office based corporate companies are a thing of the past. We put remote working first so that we can find the BEST people for the job no matter where they are located. We support each other through everything we do. We have established and lifelong learning processes
	We want people to be positive, confident and enthusiastic. With heart and soul! We only hire talented, competent people who put the Z's firmly in buzzzzzz.
	Company-wide we encourage people to innovate, and work on new ideas and technologies. We won't compromise on quality. We are proud to share our work with employees, partners and customers. We build in capacity for innovation by implementing an intelligent, strategic and disciplined approach.
	We minimize the negative impact on the environment wherever we can. Our data centers are powered by green energy. We offset our company-wide CO2 emissions through re-forestation programs.

Desired Skills:

- C# / .NET
- ASP.NET (MVC)
- HTML, JS, CSS
- English is used on a daily basis, therefore an intermediate level of written and spoken knowledge is a must.
- Ability to handle time pressures and work in a friendly, remote virtual-team.

• Ability to work in your home office
• Flexible working hours
• 25 days holiday to all employees
• Additional one day paid leave on your birthday
• Annual company retreat, where we mix, socialize, have some fun and do some work together

cloudficient Software AG
Alpenstrasse 15
